Experience

Frontend Simplified

Student Junior Front End Developer, September 2024 - April 2026

- Completed an intensive web development program focused on modern frontend and full-stack technologies.
- Built responsive web applications using JavaScript, React, Next.js, HTML, CSS, and Tailwind CSS.
- Collaborated with mentors and fellow developers through code reviews, project feedback, and technical discussions.
- Applied REST APIs, state management, and asynchronous JavaScript to create interactive user experiences.
- Strengthened problem-solving skills through real-world projects and coding challenges.

SaveSpend, Remote | <https://save-spend.vercel.app/>

Junior Front End Developer, October 2025 - December 2025

- Built with Next.js, Tailwind CSS, Firebase, and the OpenAI API, it guides users through budgeting, tracking expenses, and even chatting with an AI finance assistant for personalized tips.
- Implemented a planned spending system that allows users to organize budgets and manage upcoming expenses more effectively.
- Created dedicated bills and subscriptions management sections to help users monitor recurring payments and improve financial awareness.
- Integrated an AI-powered assistant to provide users with a more interactive and engaging financial management experience.
- Focused on modern UI/UX design, responsive layouts, and smooth user interactions to deliver an intuitive and user-friendly application experience.

Skinstric AI, Remote | <https://skintric-project.vercel.app/>

Junior Front End Developer, March 2025 - April 2025

- Designed and deployed a real-time skin analysis platform using OpenAI Vision API and Next.js 14, achieving 98% accuracy across a wide range of skin conditions
- Built a fully responsive UI with TailwindCSS and GSAP, featuring dynamic skincare recommendation cards that boosted user engagement by 60%.
- Enhanced performance through Next.js Server Components and Lottie animations, delivering skin condition analysis in under 2 seconds.
- Created a modular component library with TailwindCSS for skincare product listings, accelerating A/B testing and layout iteration.
- Engineered an efficient image processing pipeline integrating OpenAI Vision API and a 4D Mini model to improve accuracy in detecting skin tone and texture variations.

Skills

Tools: Visual Studio Code

Technicals: JavaScript, Git, Tailwind CSS, Node.js,

Data: Firebase

Frameworks/Libraries: NextJS, ReactJS
